

Total Parenteral Nutrition

Quality Patient Care

Providing alternative sources of nutrition and improved quality of life for your patients' unique needs.

Amerita collaborates with healthcare professionals to provide each patient with the most thorough evaluations and recommendations for total parenteral nutrition (TPN) needs.

Customized Nutrition Needs

Amerita's comprehensive TPN protocol includes:

- Customized formulations based on the patient's nutrition, electrolyte, and fluid needs
- Monitoring and evaluation support from a team of Home Infusion Pharmacists and Dietitians
- Individualized patient and caregiver training provided in home or outpatient setting to assure that therapy continues as ordered by the physician
- Helping patients adjust to alternative sources of nutrition and, when possible, to begin eating again

Make Your Job Easier

Amerita is focused on providing complex pharmaceutical products and services for patients and offers:

- Timely insurance verification expediting patient care
- Coordinated nursing and home care
- Delivery of nutrient-rich solutions to your patient's home or hospital
- High patient satisfaction scores measured by an independent company
- Registered Dietitian for consultation
- 24 hour patient access to nursing and pharmacy

It's Your Call

Meet the total parenteral therapy needs of your patients with local, knowledgeable, more personal care. Contact Amerita today.
